

WANT TO STUDY ABROAD?

COME TO GIS OAS ORIENTATION

The GIS Overseas Academic Study program is your chance to broaden your horizons, to test your English and academic skills. OAS offers four program destinations and two paths of study.

- One semester at any of the four destinations.
- A full academic year at Massey University in New Zealand.

Earn credits toward your graduation. All GIS students are eligible to apply, but only those who meet certain academic and English language requirements will be accepted.

Not sure if you want to go, or which destination is a good fit for you? Join us at the orientation, and meet the staff. We can help you decide.
