

Permission to Release Over the Internet

9999 Year 99 Month 99 Day

To Head Librarian, Hosei University Library

I hereby consent to allow my writings (doctoral dissertation in its entirety and/or abridged form) as stipulated below, to be made public free of charge through the publication servers of the Hosei University Library Repository and the National Diet Library.

This authorization is given with the full understanding of and in compliance with the Hosei University Library Memorandum concerning the internet publication and downloading of dissertations

Internet Publishing and Downloading of Dissertations

Hosei University Library

New Regulations concerning degrees were put into effect 2013 April 1. Accordingly, dissertations are now being made publicly available to the largest number of people possible, in observance of directives from MEXT, through academic repositories stored in the National Diet Library. It is expected that information about dissertations in these repositories obtained through the National Institute of Informatics (NII) portal site JAIRO, the academic database CiNii etc will spread far and wide.

Publication of the dissertation will be conducted according to the Hosei University Library Repository Implementation Guidelines. (see attached sheet). Under this policy, the author retains all rights to his/her writings. As these publications are dissertations, it is possible to withdraw them from being made public if the interests of the author are overridden.

Attention should be paid to the following concerning publication of the dissertation following degree conferral and handing in of this authorization:

<NOTE>

- 注 1 This authorization allows the uploading and downloading of dissertations over the internet, in accordance with public transmission rights as prescribed by the Copyright Act.
- 注 2 The Library will convert the dissertation in PDF format, using the “harvesting” method, search engine and academic portals by attaching necessary *metadata* and the header *Hosei Repository* to each page of the PDF file for easier *searches*. Note of caution: the file will be published as is and any personal information, such as the author’s student number, included in the file will also be disclosed.
- 注 3 Dissemination of the data via the internet in the form of copying, printing and downloading, as stated on the Hosei University Repository home page is specifically for teaching, study and/or research purposes.
- 注 4 For co-authored dissertations or dissertations using material requiring permission, internet transmitting authorization is also required from the parties in question.
- 注 5 Internet dissemination will take place after the author has contacted any other publishing company which has had or will have an interest in this publication and obtaining their authorization to transmit his/her work over the internet. Please see the Graduate School office as soon as possible if the request has not been granted.
- 注 6 The Library, in accordance with the MEXT amendment regarding the dissemination of academic work, encourages methods to achieve the more effective dissemination of academic works. To this end, translation of the dissertation title, and keyword searches are provided. Cooperation is encouraged and appreciated.
- 注 7 If the space provided on this sheet is not sufficient, please note the necessary information on a separate sheet.
- 注 8 Authorizations received for the purpose stated above will not be used for any other purpose. However, please be advised that a part of the operations may be entrusted to an external organ, if deemed necessary to complete the process of internet publishing,

<Considerations>

Please inform the Graduate School person in charge if circumstances—such as patent applications or applications for a utility model--should change and withdrawal of internet publishing is desired.

Hosei University Library Repository Implementation Guidelines

(Purpose)

1. Hosei University Library (hereafter to be called Library) in addition to supporting the education and research policies of the University also promotes contributions to society in its gathering and storing of the results of the Institution's educational and research activities/efforts. The Hosei University Library Repository (henceforth to be known as the Repository) gathers, stores and disseminates the information *with in* and *with out* the University. The Repository implementation policy is as stated below:

(Registrants)

2. The following may register the outcomes of their educational and/or research activities (hereafter to be called *registrants*)
 - (1) Full time professors at Hosei University
 - (2) Full time undergraduate and graduate students
 - (3) Others, as admitted by the Head Librarian

(Requirements)

3. Requirements/regulations are as follows
 - (1) Must be results of educational or research endeavors
 - (2) Major part of the work was done while at the University
 - (3) Able to be disseminated over a network

(Registrant Application)

4. Upon receipt of the Registrant Application and Internet Publishing Authorization, works will be registered in the Repository System.

(Use of Registered Material)

5. With the author's permission, the Library will use the registered results of educational and academic activities as follows:
 - (1) Copies of the work to be uploaded on the Repository storage
 - (2) Free transmission of a number of copies through a network
 - (3) Copies and media conversion of data for preservation and maintenance of use

(Notice of Copyright compliance to users)

6. The Library notifies users that the copyright law must be respected.

(Non-registered copyright holders)

7. Should the copyright belong to not only the registrant, the following applies
 - (1) In the case the registrant is one of two or more co-authors, the registrant must obtain permission in writing from the other author(s).
 - (2) Should the copyright be held by another person or group, the registrant must in writing declare that permission was received from the others. This is not necessary, however, if it is widely known that the copyright holder has allowed his/her work to be shared in the past.

(Retaining of copyright)

8. The copyrights of all results of educational and research endeavors registered with the Repository are held by the registrant.

(Deletion of registered material)

9. Material registered with the Repository may be deleted in the following situations:
 - (1) The registrant applies to have his/her work deleted and the Repository Committee so agrees.
 - (2) Should the Repository Committee determine that the contents offend public order and/or morals or be illegal or significantly damage the University's honor, the registered work(s) will be deleted.

(Change in the regulations)

10. Any revision or change in the regulations will be through the deliberations of the Library Repository Steering Committee.

Addendum

In effect since 2006 October 1
