

Feedback on Oxford EMI Online Courses held in Japan 2020

- At first, I was very nervous, but it turned out to be a great experience for me. I learned so much about offering and taking courses online.
- Your entire course was really well prepared. I am just amazed at how wonderful and carefully designed the course was. I was lucky to join it as a student and experience this from a student's perspective.
- The setup of Moodle platform and the Zoom sessions were very well designed and chosen with activities and tasks and resources. The opportunity with the Cafe and the Group Area was good too.
- I liked the mixture of lectures and going over the Moodle material.
- I thought the way the course was designed was informative, critical and inspiring. I also thought that (the trainers') collaboration and the roles they played gave me lots of ideas about how to go about holding INSET sessions at my university.
- Although I was eagerly expecting to attend a face-to-face program, I can say that I really enjoyed online program. It was like a complete teachers training /Faculty development program that is certainly helpful for the instructors not only for EMI, but in general for education in all medium. It was highly planned and designed to make effective communications between students and teachers with a view of transferring knowledge. I like to express my thanks and gratitude for your great efforts and team-work to make this program successful.
- Each day, we learned new things, techniques and methods those would be really important to be an EMI teacher. It was great opportunities to meet with different multidisciplinary teachers and learn about them and their precious ideas, opinions and experiences which will be helpful for EMI professionals.
- I'm seeing EMI more as a pedagogical tool rather than having a list of helpful expressions for the EMI instructor.
- It is fortunate for me to have an online learning experience myself at the EMI course, so I can hopefully design online learning better than having zero experience.
- This was an excellent opportunity for me to learn how subject teachers approach their teaching using critical thinking.
- I am reporting about this course to my university, and I recommend it to all teachers doing EMI and trainers who are dealing with EMI training. Thank you very much for a valuable learning opportunity! I not only learnt about EMI but also about online distance learning and how to design the activities to make the learners autonomous, making sure that there is a lot of cognitive involvement. I was really challenged!
